The challenges

Do you experience lack of clarity and a standardised method for data collection and measurement of environmental, social and governance (ESG) data?

Do you face time inefficiencies due to manually assessing ESG maturity?

Do you have an automated metric-assessment tool that adheres to the global standard metrics laid out by Sustainability Accounting Standards Board (SASB) for ESG?

Do you find that the process of managing ESG assessments is not always holistic due to insufficient judgement parameters?

Do you have a future vision for your ESG efforts?

Our solution

Sustainability Assessment Platform is a one-stop solution for sustainability evaluation and maturity assessment for organisations that wish to measure and report performances based on aspects. This solution's intelligence scoring system is effective in assessing and benchmarking ESG maturity on various aspects and themes through a customisable question management system (QMS) and specific key performance indicator (KPI) section for ESG metrics.

PwC offers a complete suite of services covering formulation of initial ESG strategy for companies to streamline and establish good governance practices within the organisations based on the maturity level.

Why do you need it?

- Provides a comprehensive overview of portfolio companies and sector-wise metrics in one place
- Compares company ESG performances and manages compliance for assessment completion
- Performs ESG maturity analysis which sets up ESG evaluation framework for portfolio companies; also, it has QMS with specific scoring metrics for different sectors
- Automates highly precise maturity assessment and reduces workforce hours; information about company resource efficiency helps prevent shortages and price shocks
- Mitigates pressure to reduce costs through decreased workforce demands, and lowers capital and operational expenditure through more practical, sustainable solutions
- Enables meeting SASB requirements in a seamless manner, which is a major concern and often distracts organisations from business objectives

Sustainability Assessment Platform Comprises Three Key Modules

PwC User Persona

- Onboard/Deactivate PE fund
- Manage master QMS (Questionnaire Management System)
- Manage master KPI

Portfolio company/supplier

- Fill Onboarding form
- Fill responses on survey
- View results/ insights and assessments taken
- download report/ detailed report

PE fund/Organization

- Onboard/Deactivate portfolio company
- Design & Send ESG questionnaire & KPI Survey
- View results/insights
- Sector wise comparison of portfolio companies
- Download report/ detailed report

Features

User-friendly interface for the collection of qualitative and quantitative ESG data on a centralised platform through a customisable QMS

Intelligent scoring machine for the evaluation of companies across various themes and aspects of ESG

Conversion of raw data into KPIs to provide visibility underneath the metrics to act on them

Interactive dashboards to visualise trends tailored for businesses and benchmarking against the industry-best score and practices

Overview of portfolio companies and sector-wise metrics, all in one

Benefits

Get detailed insights into your ESG maturity; it comprises questions around policies, processes, implementation, and commitments to assess your organisation's ESG readiness.

Record KPIs and track performance, monitor progress, and define specific performance improvement targets for short, medium, and long terms.

Use effective visuals to identify risks, areas of improvement and unlock opportunities to create long-term quantifiable impact across ESG themes.

Download and share curated assessment reports with your leaders, investors and stakeholders to showcase an organisation's maturity in ESG aspects over a period.
