SALESFORCE ESG ACCELERATOR

Flexible solution to digitally capture, monitor and report/disclose ESG metrics. Currently customized for BRSR and GRI frameworks; easily upgradable to accommodate other frameworks

INDUSTRY FOCUS (Sector Agnostic) :
Manufacturing, Logistics, Steel, Durables, Pharma, Mining, Oil and Gas etc

PROBLEM AREA

Sustainability requirements from Regulators, Investors and Clients.

Continuously changing regulations; varied compliance requirement across geographies.

Current Data Management – Manual, legacy systems, disintegrated, inappropriate granularity, low quality, incompleteness, duplicity.

SOLUTION OVERVIEW

Our cost-effective accelerator, built on Salesforce Platform, allows the user to capture entire BRSR and GRI data across all defined General, Environment, Economy, Social and Governance metrics. It also uses Flow Builder to easily capture user input through Subjective questions and answers approach

It has 100+ Reports and Dashboards to visualize compliance and additional use cases. Using inbuilt Disclosure Generator tool, client can easily extract and edit his framework specific compliance report as a handy pdf and word document. The accelerator also gives a glimpse of how simplified and user-friendly interfaces can be developed using Experience Portal.

Client can flexibly opt to implement either 1 or both packages out of BRSR and GRI

PwC globally uses Salesforce CRM to manage its own Leads/ Opportunities. Business teams can recommend this accelerator to any sector client who wants to monitor and improve his ESG KPIs

KEY FEATURES

- Data and Annexure repository
- Disclosure Reporting and analytics
- Framework flexibility
- Compliance

BENEFITS

- One-stop solution for entire ESG data and annexures
- Provides real-time reporting visibility into compliance and use case metrics. Users can view, download, subscribe such reports and dashboards
- Single click modifiable disclosure document generation
- Use all other OOTB Salesforce features
